The following is an examiner's statement of reasons for allowance:

In regard to claims 10-12, 14, and 17, the prior art does not disclose a video-signal recording/reproduction apparatus and meta-data display method with the combination of limitations specified in the claimed invention, specifically the limitations of:

a meta-data synthesis apparatus for producing a synthesized video signal by extracting at least a part of said meta data from said reproduced video signal including said meta data added to every frame and synthesizing said extracted part with a video portion of the reproduced video signal; wherein said imaging apparatus receives, said synthesized video signal including said meta data and displays said meta-data, from said video signal, at the imaging apparatus synchronously as the video signal is recorded by the recording/reproduction unit, as stated in claim 10 and similarly stated in claim 14

In regard to claims 19-24, the prior art does not disclose a meta-data display system with the combination of limitations specified in the claimed invention, specifically the limitations of:

an imaging apparatus that captures video content and generates the video signal and meta-data associated with each frame of the video signal, and having a display adapted to display the meta-data of the captured video content synchronously with the real-time video captured by the imaging apparatus; a meta-data addition apparatus that receives the meta-data and the video signal and

Art Unit: 2622

combines the meta-data associated with each frame of the video signal and the video signal, and outputs a combined video signal; a storage device for storing the combined video signal; and wherein the imaging apparatus receives the combined video signal from the meta-data addition apparatus, and the display on the imaging apparatus displays the meta-data from the combined video signal, as stated in claim 19.

In regard to claims 25 and 27-29, the prior art does not disclose a meta-data display system with the combination of limitations specified in the claimed invention, specifically the limitations of:

a meta-data synthesis apparatus for extracting at least a part of the meta-data associated with every frame of a video signal and synthesizing the extracted meta-data with the video signal to produce a synthesized video signal; wherein in the synthesized video, each video frame is visually combined with meta-data associated with that video frame, and the synthesized video signal is transmitted to the imaging apparatus; and the image capture apparatus includes a display adapted to display the meta-data of the captured video content synchronously with the real-time video captured by the image capture apparatus, as stated in claim 25

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
